

BUILDING

PREFACE

This is the first issue of *Building* as a separate Part of the *Statistical Register of New South Wales*. It contains statistics for 1958 and earlier years. Statistics of building activity were formerly included in the Part *Social Condition* of the *Statistical Register*, the previous issue of which was for 1954-55.

The statistics given in this publication should be read in conjunction with the *Official Year Book of New South Wales*. For the most recent statistics, the reader should refer to other publications of the Bureau, particularly the *Statistical Bulletin* and the *Monthly Summary of Business Statistics*.

My thanks are tendered to the responsible officers of the various State and Commonwealth authorities and to others who have supplied information, often at considerable trouble.

K. Davison
Deputy Commonwealth Statistician

Bureau of Census and Statistics,
Sydney.

18th January, 1960.

12.	New Houses in N.S.W.: Material of External Walls and Type of Builder, 1951 to 1958	27
13.	New Houses and Flats Completed in Local Government Areas of N.S.W., 1951 to 1958	28
14.	New Houses and Flats Commenced and Completed in Local Government Areas of N.S.W., 1958	38
15.	Dwelling Units Approved in Areas of N.S.W., 1949 to 1958	43
16.	Men Engaged on Site in Construction of New Building in N.S.W., 1951 to 1959	44

BUILDING

EXPLANATORY NOTES

Sources of Building Statistics

Statistics of building activity are based on:—

- (a) local government authorities' returns of building permits issued;
- (b) quarterly returns collected from contract and speculative builders who regularly engage in the erection of buildings;
- (c) progress reports on construction from owner builders, i.e., persons other than recognized builders who are erecting buildings owned by themselves (principally their own homes) without the services of a contractor responsible for the whole job;
- (d) returns of building by or for governmental authorities.

Scope of the Statistics

The statistics relate to building structures, and exclude railways, roads, bridges, earthworks, water storage, and other types of construction.

Repairs and renovations are excluded because of the difficulty of obtaining satisfactory records. The statistics of building approved include alterations and additions for which a building permit was issued or which were to be undertaken by or for a governmental authority; but the statistics of building commenced and completed include only those alterations and additions with an estimated cost of £5,000 or more.

The statistics of government building cover the whole of New South Wales. The statistics of private building approved cover that part of the State (all municipalities and the larger residential areas within shires) subject to building control by local government authorities. For private building commenced, completed, and under construction by owner builders, the statistics are also confined to this part of the State; but for private building undertaken by other builders, the statistics cover the whole State. The statistics therefore exclude some building in rural areas.

Definitions

The following definitions are necessary for interpretation of the statistics:—

1. Building is classified as *Private* or *Government* according to ownership. Building carried out for governmental authorities by private contractors is therefore classed as Government. Building for private ownership for which finance is provided or material supply is sponsored by governmental authorities is classed as Private.
2. *Value* represents the estimated cost of the building when completed, excluding the cost of the land on which the building is erected.
3. *Value of Building Approved* is —
for private building, the value of building permits issued by local government authorities;
for government building, the value of contracts let or work commenced and day labour jobs authorised by governmental authorities.
4. *Number of Houses, Flats, and other Dwellings Approved* is —
for private building, the number of individual dwelling units covered by building permits issued by local government authorities;
for government building, the number of individual dwelling units covered by contracts let or day labour jobs authorised by governmental authorities.
5. *Commenced*. A building is regarded as having been commenced when work on foundations has begun.
6. *Under Construction*. A building is regarded as being under construction at the end of a period if it has not been completed and work on it has not been abandoned.
7. *Dwelling Units*. The numbers of houses, flats, and other dwellings are recorded in terms of separate dwelling units. Each flat in a group of flats is counted as a separate flat dwelling unit.
8. *Conversions to Flats*. The numbers of flat dwelling units that result from conversions of old buildings into flats (see page 43 for the number approved) are not included in the numbers of *new* flats. However, the value of flat conversions is included in the value of flat building approved in all years, and in the value of flat building commenced or completed from December Quarter, 1955.
9. *Temporary Dwellings* (such as garages, sheds, etc.) are not included in the number of houses, flats, or other dwellings.
10. *Newcastle Urban Area*. This area, which was defined for statistical purposes in January, 1954, comprises the City of Newcastle and portion of the adjoining Lake Macquarie Shire.

† Includes alterations and additions with an estimated cost of £5,000 or more.

‡ Not available.

¶ The Metropolis was enlarged on 1st January, 1954, by the transfer of 425 sq. miles from the "Balance of Cumberland Division". Figures for 1954 and later years are not comparable with those for earlier years.

§ Figures for 1954 and later years (which exclude Newcastle Urban Area and Greater Wollongong) are not comparable with those for earlier years, which include these areas.

* From 1st August, 1958, Lower Hunter Shire was abolished and divided between Maitland and Newcastle Municipalities and Dungog and Patrick Plains Shires.

† From 1st January, 1957, Cessnock Municipality and Kearsley Shire were amalgamated to form Greater Cessnock Municipality.

‡ From 1st July, 1958, Dungog Municipality and Wallarobba Shire were amalgamated to form Dungog Shire.

§ From 1st January, 1958, Scone Municipality and Upper Hunter Shire were amalgamated to form Scone Shire.

¶ From 1st July, 1954, Gerringong and Jamberoo Municipalities were amalgamated with Kiama Municipality.

* Figures for 1954 and later years are not comparable with those for earlier years; see note ‡ on page 24.

† Figures for 1954 and later years (which exclude Newcastle Urban Area and Greater Wollongong) are not comparable with those for earlier years, which include these areas.

No. 16. Men Engaged on Site in Construction of New Building in N.S.W., 1951 to 1959

There is inherent difficulty in ascertaining the number of men actually engaged in the construction of new building, because of frequent movement between jobs and because men of some occupations (e.g. electricians and plumbers) frequently work on a number of jobs which are in progress simultaneously. To overcome this difficulty, contract builders are asked to record the numbers of men actually working on their jobs on specified days, including men absent on account of weather and other chance causes.

The figures in this table relate to persons actually working on the jobs of contract builders and governmental authorities. They include persons actually engaged on alterations, additions, repairs, and maintenance when these jobs are undertaken by contract builders and governmental authorities.

The figures exclude persons working on owner builders' jobs, persons working on the jobs of builders who undertake only alterations, additions, repairs, and maintenance, and building tradesman engaged in factories, mines, etc.
